

Table 1. Dimensions and factors inherent in local applicability/transferability.

| Dimension | Factors |
|------------------------|--|
| Setting | Intervention need Country-level similarity Population-level similarity |
| Ease of Implementation | Intervention characteristics Capacity to implement Sustainability of implementation |
| Congruence | With beliefs and values With previous experience With other evidence |
| Effectiveness | Original study findings Potential effectiveness |
| Adaptation | |
| Study design/methods | Sampling methods Size/coverage of intervention Validity Analysis/other information about findings |
