

Table 1. Matrix of assumptions for participants with missing data for continuous outcomes in intervention and control arms

		Assumptions about the means of participants in intervention arm		
		<i>C. Mean score from the control arm of the same trial</i>	<i>D. Worst mean among the intervention arms</i>	<i>E. Worst mean among control arms of included trials</i>
Assumptions about the means of participants in control arm	<i>A. Best mean among intervention arms</i>			Strategy 4
	<i>B. Best mean among the control arms</i>		Strategy 2	Strategy 3
	<i>C. Mean score from the control arm of the same trial</i>	Strategy 1
